

PRESS RELEASE

For Immediate Release: 1/31/2019

EXTRA STREET LIGHTING ADDED TO THE RANDALL PARK NEIGHBORHOOD TO INCREASE SAFETY FOR STUDENTS.

The University of Wisconsin-Eau Claire Student Senate has been advocating for extra street lighting to be installed in the Randall Park neighborhood. After working closely with the City of Eau Claire, the Historic Randall Park Neighborhood Association, and Xcel Energy, extra street lighting has been installed in the Randall Park neighborhood to increase safety for students and community members. Motion sensor lighting has been added to the mid-block between 2nd and 3rd Avenue on Niagara Street on a trial basis. These lights will be tested for roughly a month.

There are plans to have four more lights installed in the area in the near future. The City of Eau Claire has also agreed to have more streetlights installed at the mid-blocks and near alley entrances.
