Wisconsin Legislators Should Follow President Trump's Example--Support Infrastructure Investment and Collaborate with the Trades

MADISON, Wis. [February 8, 2017] – President Trump recently issued Executive Memoranda making it possible for two significant pipeline projects to move forward, the Keystone XL Pipeline and the Dakota Access Pipeline. President Trump also met with leaders of the building trades to discuss the much needed investment in infrastructure like these pipelines in the United States.

Wisconsin Infrastructure Investment Now, Inc. (WIIN) applauds President Trump's collaboration with the building trades on infrastructure investment. President Trump took the time to sit down with the trades to discuss job creation and infrastructure investment. President Trump's actions demonstrate that he values the voice of the middle class blue-collar worker.

WIIN encourages Wisconsin legislators to follow President Trump's lead. Wisconsin faces a significant shortage of skilled tradespeople over the next 5 – 10 years. Wisconsin also faces the daunting task of funding much-needed improvements to our crumbling infrastructure, including water pipelines, roads, bridges and schools. Investment in infrastructure will also give Wisconsin's economy a much-needed boost.

In order for Wisconsin to grow its economy, responsible investment in infrastructure and collaboration amongst Legislators, businesses and middle class blue-collar workers is needed.

Wisconsin Infrastructure Investment Now, Inc. ("WIIN") promotes and supports the responsible investment in, and expansion of, transportation facilities, renewable and traditional energy projects, mining and other infrastructure projects in Wisconsin. WIIN promotes governmental policies that support infrastructure investment and expansion.
