### **No ID and No Way to Get One. There is help!**

Starting with the Feb. 16 elections, voters will need to show a valid and acceptable form of identification. For most of us, our non-expired WI driver's license will serve the purpose, but what if you don't drive you don't have an ID? If you don't drive, how will you get to the DMV to get one?

Wisconsin has over 40 Mobility Managers throughout the state who collectively make up the WI Association of Mobility Managers or WAMMM. Mobility Managers work for and with transportation systems so you know about your transportation options, learn how to use them, and get where you need to go. This includes getting an ID and in many cases, getting to the polls on Election Day.

Did you know...

- Southwest Community Action Program LIFT Program can give you a volunteer driver ride to get an ID or to the polls.
- The 18 county New Freedom transportation program operated by the Center for Independent Living of Western Wisconsin and North Country Independent Living offers a ride to get an ID or to the polls in the western and northwest counties.
- Transit systems in Janesville and Beloit all run routes that can get you to the DMV.
- Kenosha Transit provides rides to the polls until 7:30 pm on election day
- Many aging units/ADRCs provide rides for the purpose of exercising your civic duty.

If you don't know how to access these services, the Mobility Manager can help you.

Not sure who to contact? Use the interactive map at [www.wi-mm.org](http://www.wi-mm.org). Contact the Mobility Manager in your area to get information and find out if these rides are offered in your area. This statewide network of transportation professionals exists to help you navigate the transportation options so you can stay involved in your community and **VOTE!**

---

*The WI Assn. of Mobility Managers, WAMMM is a non-profit 501(c)6 whose members are in the human services and transportation fields. They promote mobility management; the practice of using all available resources, and developing new ones, to improve mobility, increase efficiency and reduce costs.*
