## **Statement of Representative James to Governor Evers' Budget Address**

"I wish money grew on trees, it could solve a lot of problems. But it doesn't and I feel Governor Evers' budget is not being honest to Wisconsinites. We agree our roads need to be better, our access to affordable health care needs to be better and improvements to our system of educating our future generation needs to be better.

The voters of Wisconsin cannot bear the full cost of the Governor's proposals and for this reason I look forward to being part of the budget process as it makes its way through the Legislature."
