State Representative Brett Hulseley Announces Run for Governor--

Brett's Get Wisconsin Working Again Plan would create thousands of jobs

Madison, WI—Today State Representative Brett Hulseley kicked off Earth Week by announcing his run for Governor as a Democrat. “I am getting a great reception for my Get Wisconsin Working Again Plan as I travel the state,” Hulseley noted. “People want a real plan to get back to work, not more divisive politics.”

Brett's Get Wisconsin Working Again Plan reinvests \$2.1 billion to create clean energy jobs, increases job training, public school, UW system, and technical college investments, reverses the Walker tax increases on working families and seniors, saves babies and reduces abortions, protects communities from strip mining, and creates a Penokee Hills State Park instead of one of the world's largest strip mines.

“Gov. Walker's Reign of Error has made Wisconsin 2nd in the nation in losing jobs. We have to turn the state around to create a better future for our children and neighbors,” said Hulseley, who runs an award-winning energy and environmental consulting business, Better Environmental Solutions.

A former union vice president, Hulseley will make restoring worker safety, rights and bargained a top priority. “We should restore workers' rights and reverse Gov. Walker's unnecessary pay cuts immediately to jump start our economy and create safer workplaces,” Hulseley said. “Gov. Walker's statement that we were ‘broke’ was rated a [‘Pants on Fire’](#) lie by the Milwaukee Journal Sentinel. These extreme cuts were not needed.” Hulseley offered many amendments to reverse the Walker Unfair Despair Act 10 during the 61 hours of Assembly debate.

Hulseley has more than three decades of public service experience that include: four years in the State Assembly; 14 years on the Dane County Board, four as chair of the Personnel and Finance Committee; 17 years at the Sierra Club; Environmental Policy Advisor to the 1991 Clinton-Gore Campaign; and a Volunteer in Service to America, VISTA volunteer, in Alaska during the 70's energy crisis.

Brett's educational background includes: studying at UW and Dartmouth College's Thayer School of Engineering; a Master's Degree in Natural Science from the University of Oklahoma; and a B.A. as an Independent Scholar in Political Economy from Middlebury College, where he ran and skied cross country.
