Representative Emerson Statement on UWEC Science Hall Project

MADISON – Last night, the Joint Committee on Finance voted to approve Governor Evers’ \$109 million capital budget request for the new UW-Eau Claire Science and Health Sciences Hall project. Representative Jodi Emerson (D-Eau Claire) released the following statement in response.

“Over the past several months, I have had the honor of meeting with administrators, students and community members who have made clear to me how important this project is to the future of UW-Eau Claire.

“It is wonderful to finally have such exciting news for our region coming out of the budget process. The UWEC partnership with Mayo Clinic will help put the Eau Claire region in the forefront of education, research and healthcare, and I am proud to have had a hand in advocating for this much-needed investment.”
