Arch Electric Recognized As A Top Solar Contractor In Wisconsin

Company continues climbing national rankings, now top residential rooftop contractor in state

[Plymouth, Wis.] – Arch Electric, Inc. is proud to announce that it was named a **2021 Top Solar Contractor** by *Solar Power World*, a prominent industry trade magazine for the solar industry. In this year's annual list, Arch Electric is ranked as the **#1 rooftop solar contractor in Wisconsin** – and 11th in the nation as well as the 86th overall largest solar company in the United States, after landing at 95th and 189th in 2020 and 2019, respectively. This marks the 4th consecutive year that Arch has received national recognition.

The Top Solar Contractors list is developed each year by *Solar Power World* to honor the work of solar installers big and small. Solar firms in the utility, commercial and residential markets are ranked by number of kilowatts installed in the previous year. Companies are grouped and listed by specific service (developers, electrical subcontractors, EPCs, installation subcontractors, rooftop installers), markets, and states. Arch has earned the top spot in Wisconsin by carrying out our rooftop solar projects all the way from conception and design through construction and powering on.

As the solar industry is maturing, Arch Electric is emerging as a clear leader in Wisconsin. Arch installed 29.26 MW (megawatts) of solar power in 2020. Since its founding in 2003, the company has installed over 60 MW of solar. Based in Plymouth and with offices in Milwaukee and Madison, Arch Electric services customers across the entire state.

"It's an honorable achievement to be ranked in the top bracket alongside companies in the Southwest and West Coast, which historically have more developed solar markets," said Ed Zinthefer, Arch Electric President and Founder. "It really proves that not only can solar work in Wisconsin, but it can thrive here by providing jobs and savings for folks even this far north."

"Not even COVID-19 closures and slowdowns could prevent the solar industry from installing fantastic numbers last year," said Kelly Pickerel, editor in chief of *Solar Power World*. "The *Solar Power World* team is so glad to recognize over 400 companies on the 2021 Top Solar Contractors list that not only survived a pandemic, but thrived in spite of it."

About Arch Electric, Inc.

Arch Electric, Inc. is a Wisconsin-based electrical contractor specializing in solar and related fields such as energy storage, EV charging, light utility solar, and commercial solar along with Operations and Maintenance services since 2003. Today, Arch is considered the largest provider of Solar in Wisconsin that does all its work in-house. Our 60+ MW portfolio includes residential and commercial rooftop systems, carports, pole mounts, trackers, large and small ground mounts from 10 KW to 5 MW and up for utilities, and unique flat wall solar systems. Our mission is to educate, inspire, and empower current and future generations to choose a clean sustainable form of energy.
