Statement on the UW Board of Regents' support for the enumeration of the UW-Veterinary Medicine building project in the 2019-21 State budget.

"UW Veterinary Medicine is one of the best schools of its kind in the world," said John Schaefer, Director for Badger Advocates. "We know it is an asset for Wisconsin's farming community; pet owners know it is the most-advanced care in the Midwest. What people might not know is UW Veterinary Medicine is vital to medical research in our state and country. We should all support the tremendous level of expertise that exists right here in the dairy state."
