September 9, 2021

### **President Biden Abuses Federal Power on Covid-19 Mandates Nass: Biden playing Covid-19 card to sideline discussion of his Afghanistan debacle.**

Senator Steve Nass (R-Whitewater) issued the following statement in response to President Biden's announcement regarding his abuse of federal power to require employers with 100 or more employees to mandate Covid-19 vaccination for all employees. Biden also announced numerous other abuses of federal authority to attempt the enactment of national Covid-19 mandates covering masking, testing and forced vaccinations.

*"Today, an incompetent President announced several abuses of his authority to play the Covid-19 political card to redirect the public's attention away from his Afghanistan debacle.*

*President Biden declared war on the freedom and liberties of every American by abusing his authority to prevent citizens from earning a living unless they prostrate themselves before his political demands. Democrats should be awfully careful about supporting these abuses because, if allowed to stand, a future Republican administration will have earned these same tyrannical powers.*

*It is now absolutely clear that President Biden and his Democrat allies will use every abuse of authority to jeopardize our constitutional rights and subject every person to their control. We must resist by stopping them in the courts and working every day to defeat elected Democrats at all levels that support this President's abuses."*
