Senate Approves Foxconn Deal

Madison... Sen. Olsen released the following statement after the State Senate approved August 2017 Special Session Assembly Bill 1, known as The Foxconn Bill.

“Bringing the Foxconn assembly plant to Wisconsin has the potential to transform our manufacturing sector and position us to meet the challenges of the twenty-first century. I believe the state has managed its risk by tying tax credits to actual job creation, only paying out tax credits when actual jobs are created.”
