---

The letter seeks more information on the failure of DMCPS to meet initial case assessment and resolution deadlines. **The latest statistics show over 50% of initial assessments are not completed during the required time frame.**

"AFSCME is eagerly awaiting a response by DCF to these critical questions posed by legislators," said Rick Badger, Executive Director of AFSCME Wisconsin. "For years our members have reported on the troubled administration of this department and we look forward to getting specific numbers and plans from Secretary Anderson on how they are addressing these systemic issues. "
